

# “Which enrollment option is right for my organization?”

Your organization is free to choose which online training option will work best to meet the needs and training goals of your center or clinic. If you are unsure which option may work best for you, consider the suggestions below:

The *General Enrollment* option may be best suited for your needs if:

- Your organization is relatively new, and/or has never had an on-site training of The LOVE Approach™ with one of our consultants.
- Your organization is committed to holding a single annual training session and/or cannot provide enough support to have ongoing training.
- The individual overseeing training is not comfortable with or does not enjoy exploring unfamiliar software and/or technology.

Use the General Enrollment, to help volunteers or staff members who come to the center in between trainings or who are unable to attend your annual training event.

The *Private Course* option may be best suited for your needs if:

- Your organization prefers an ongoing training, with training being spread out over the course of a few weeks instead of one day, or with training occurring periodically throughout the year.
  - Your organization holds an annual training session, but has a committed staff member to assist and/or facilitate ongoing training.
  - Your organization is interested in developing a training program customized to the needs of your center, and has an individual comfortable with or willing to explore unfamiliar software and/or technology.

Use the Private Course to develop a more sophisticated ongoing training program based on the needs of new volunteers or staff members.
